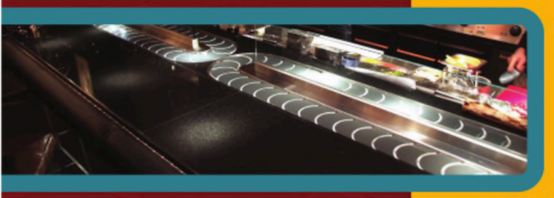
Sushi Conveyors

About 888 Brands



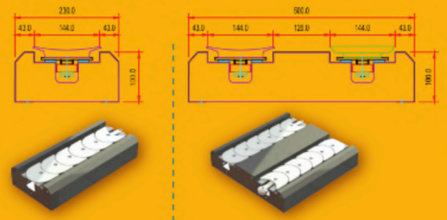
888 Brands has been building high quality Sushi Conveyor Systems since 1995. We have an extensive knowledge base of restaurant applications and can help guide you through the process of using one of our conveyor systems in your restaurant. 888 Brands is the first manufacturer of sushi conveyors and sushi related products built in the USA. All systems are built and tested in our factory located just outside of historical Williamsburg, VA.

All of our SL Series products are NSF* certified and all electrical components are UL* listed. We meet all current health code and electrical requirements you will encounter during restaurant construction.

*NSF – Is a Public Health and Safety Company that certifies products meet certain health requirements in the Americas. www.NSF.org

*UL - Underwriters Laboratories is a global independent safety science company that certifies electrical devices worldwide. www.UL.com

SL Large Profile



Dimension

	Width	Height
Single lane	230mm	100mm

Straight Section

Tee Bend

X Junction

Double 90 Degree Bend

180 Degree Drive/Idle

Benefits:

- Cost effective conveyor systems
- Short lead times, 4-6 weeks
- All conveyors are made from SUS 304 4B Stainless Steel
- Modular design, easy to install and reconfigure
- Both standard and special design layouts available
- Food grade chain material
- Made in the USA, support and install services provided nationwide
- Conveyors easily plug into a standard household power outlet, 120 volts AC
- Large installed customer base located across the Americas

Products:

- Standard conveyor systems
- Sushi Freshness System "tracks Sushi on conveyor system"
- Plates and lids
- Mobile Sushi
- Full turn-key systems which include
  - Support frames
  - Bench Seating
  - Counter Seating
  - Various cladding options to cover lower conveyor area
  - Accent lighting

How can I assure that the Sushi on my conveyor is fresh?

888 offers a Sushi Freshness System that tracks all of the Sushi plates on the conveyor. Each plate requires an RFID tag to be attached to the bottom surface of the plate. When the plate travels around the conveyor system it is monitored by a SMART control system which keeps track of how long that plate has been on the system. Once the plate exceeds a set time period of 60-180 minutes it will automatically be rejected by the Sushi Freshness System. No need to worry about spoiled food, the freshness system will constantly monitor the freshness level of your food and will automatically reject spoiled food.

WHY buy from 888?

888 has a proven track record.When investing in a restaurant the conveyor portion of the project is only a small percentage of the overall restaurant budget. Purchasing a cheaper, inferior conveyor system from an unproven overseas supplier to save a few thousand dollars is not the right decision.

- None of our competitors build their systems in the USA
- We use only UL listed motors and all our systems run on standard household voltage of 120 volts.
- Sushi Systems ship from our factory in Virginia. There is no need to pay shipping charges to import systems from manufacturers located in Asia, or Europe
- We offer short lead times, and because are systems are made in the USA by certified technicians there is no need to factor in an additional 4 weeks for sea transport like our competitors
- Support is just a phone call away. We support what we sell and since we are local we can be onsite within 24 hours if required.

888 Brands Conveyors are the highest quality conveyor systems available and all come with a Lifetime Warranty.

If you purchase a system from us and it does not function as represented by 888 Brands we will refund your money, no questions asked!
